

Fluenta Solutions Ltd. is seeking a customer-facing Quality Manager to cover the global quality requirements for Fluenta.

The Fluenta team is 50 strong and is based across offices in UK, Texas, Gdansk, Dubai and Kuala Lumpur, with a global customer base including all oil and gas producing countries.

The position of Quality Manager has recently become available, and the company is looking for a dynamic and hands-on individual to head up this department and ensure that its first-class quality credentials are upheld in the industry. In addition, as the company continues to grow, involving quality to a much higher degree in the product development process will be key, as will closer liaison with customers to ensure that quality processes are correctly aligned to industry standards and that Fluenta qualifies for vendor approvals.

#### **About You**

- A graduate in engineering or quality management
- At least 5 years of relevant QA management experience
- A working knowledge of intrinsic safety aspects of ATEX certification would be an advantage
- An understanding of HSE in the context of quality controls
- Experience of working closely with Product Development Teams within high-value, low-volume manufacturing processes
- Experience of interfacing with customers on process, regulation, and warranty
- Excellent organisational and administrative skills
- Good communication skills, ideally with experience working across multiple offices spread over numerous locations

#### **Range of Duties:**

- Representing the Quality Department to company Management and within the Product Development team
- Responsibility for all the overall coordination, reporting and administration of QA-related tasks in accordance to ISO 9001 and ISO 60079-34 certification and other relevant company certification
- Supporting the Sales teams with management and control of Fluenta on customer's and potential customer's vendor lists.
- Control of the Quality Management System
- Establishing and making sure the QA documentations and procedures are up to date
- Giving advice on all QA related activities
- Effective co-ordination of activities related to company certification with respect to products intended for use in potentially explosive atmospheres, including communication with notified bodies
- Cooperation with Ex-Responsible(s)
- Ensure that all employees are performing work according to Quality procedures

- Ensure that safety devices and personal protective equipment are provided in adequate numbers, that they are readily accessible and in proper condition, be consulted during the planning and effectuation of measures of significance for the working environment within the representative's safety area
- Responsibility for internal audits and audits of suppliers

This a full-time role based in UK (near St. Neots, Cambridgeshire) and is supported by a dedicated Product Quality team at the company's manufacturing location on Gdansk, Poland.

After the initial probationary period, the company offers flexibility to work from home for up to 2 days per week.

### **About Us**

Founded in 1985, Fluenta is a leader in the use of ultrasonic sensing technology for the measurement of flare gas. Monitoring Flare Gas is a critical aspect of managing safety and profitability within the oil and gas industry as well as providing the basis by which oil companies pay certain taxes and report environmental issues.

Fluenta Solutions Ltd. serves as the sales office for Europe, Africa and the Middle East. Our global research and development team are located at the UK site.
